

CELEBRATING

MOTORCYCLE EXCELLENCE

A complete range of motorcycle-specific
products for all your lubrication needs.

MOTOREX MOTO LINE

MOTOREX Oil of Switzerland offers a complete range of **motorcycle-specific** products for all your lubrication needs. Buying from Motorex's range of high-performance engine oils, gearbox oils, brake fluids, greases, lubricating and protective sprays means you can depend on finding the RIGHT product for your motorcycle. **No matter what brand of motorcycle or the type of riding you do, Motorex has the right oil for your application.**

QUALITY EXCELLENCE

The Motorex laboratory controls the quality of the raw materials used in each and every engine oil. The quality of the base oil is very important to the longevity and protection of your engine and how well additives blend and mix together.

It's Motorex's combination of high-quality base oils, mixed with the right additives, at the right temperature and pressures that guarantee the highest quality across the entire range!

Many of the quality additives and base oils blended at Motorex's headquarters in Langenthal Switzerland are only available in **The European Economic Community.**

Base Oils

The highest quality base oil used from the start.

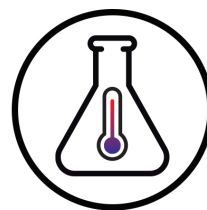

+

Additives

Blended with the right additive packages.

+

Temperature

Mixed at the perfect temperature and pressures.

DID YOU KNOW?

All Motorex products are designed, developed and manufactured in Switzerland and then shipped worldwide. This means the Motorex products you receive in Australia are the same high-quality oils and lubricants used by such racers as Dakar legend Toby Price and MXGP superpowers Antonio Cairoli and Jeffrey Herlings!

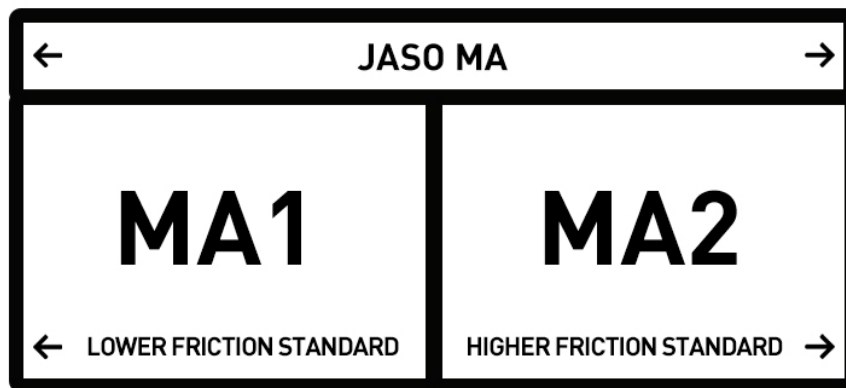

WHY JASO MA & MA2 RATINGS MATTER.

MA, MA1 & MA2 ratings mean that the oil is designed specifically for motorcycles! Keep an eye out to make sure your oil choice has these ratings.

Unlike car engines (that use a separate gearbox and engine oil), motorcycle engines require another level of performance that generic engine oils can't match. Car oils use more friction modifiers which are good for cars but aren't very good for motorcycles. These modifiers can cause clutches to slip at higher revs and gearbox pitting.

JASO classification standards were introduced for motorcycle manufacturers to ensure the correct oil is used that pass the JASO T 904:2006 clutch system friction test. **Make sure you check for the right MA standard for your motorcycle oil!**

The JASO MA standard can be further divided into 2 distinct ranges of performance.

JASO MA1: Lower Friction Standard

JASO MA2: Higher Friction Standard

	JASO MA1	JASO MA2
Dynamic Friction Characteristic Index (DFI)	≥1.45 and <1.8	≥1.8 and <2.5
Static Friction Characteristic Index (SFI)	≥1.15 and <1.7	≥1.7 and <2.5
Stop Time Index (STI)	≥1.55 and <1.9	≥1.9 and <2.5

If some properties fall within the MA1 and some within MA2 then the product is simply a JASO MA product.

**ALL MOTOREX FOUR STROKE ENGINE OIL
ACHIEVE THE JASO MA2 STANDARD.**

CHOOSE THE RIGHT ENGINE OIL

Motorex's labeling system makes it easy to select between Fully Synthetic, Synthetic Performance & Synthetic Blend engine oils.

Fully Synthetic

Performance Euro Off-Road and Street Motorcycles.

- 100% Synthetic
- Race Developed & Proven
- Multi Ester & PAO Technology
- Ultimate protection and performance
- Only recommended oil for the high-performance KTM & Husqvarna motorcycles range.

Synthetic Performance

Performance Japanese Off-Road and Street Motorcycles.

- High-performance engine oil for all Japanese motorcycles.
- Modern synthetic engine oil.
- 100% MC (Molecular Converted) technology with PAO and Ester.
- Excellent wear protection and thermal and shear stability.
- Low Noack reduces oil consumption.

Synthetic Blend

Amateur Off-Road and Commuter Motorcycles.

- A modern synthetic blend of hydro-cracked and PAO technology.
- Very good wear protection and thermal stability.
- Optimised clutch grip and absolute lubrication reliability.

Synthetic Blend

Trail & Fun Bikes.

- Broadly applicable, semi-synthetic motorcycle engine oil.
- Synthetic blend offers very stable lubricating film.
- Avoids corrosion and deposits.
- Thermal stability and good wear protection at an affordable price.

FIND THE RIGHT LUBRICANTS

CHAIN MAINTENANCE

OFF-ROAD CHAIN LUBE

Fully synthetic and wear-reducing. Tested for X-ring and O-ring chains. Waterproof, resistant to spin and pressure.

ROAD CHAIN LUBE

Special white, wear-reducing lubricant. Especially suited for X-ring and O-ring chains. Waterproof, absolutely resistant to spin and high pressure

ADVENTURE CHAIN LUBE

Special white lubricant strengthened with Teflon. **Repels Dirt & Dust.** Especially suited for X-ring and O-ring chains.

RACING CHAIN LUBE

Special white lubricant strengthened with Teflon with extreme adhesion. Tested for X-ring and O-ring chains. Extremely resistant to spin, waterproof and temperature-resistant

CHAIN CLEANER

Highly effective cleaner for all drive chains. Tested with X-rings and O-ring chains.

CHAIN CARE KITS

Includes a 500ml can of chain lube, chain cleaner and a specialized chain cleaning brush.

PASSION FOR RACING

In a competition decided by fractions of a second, only absolute perfection makes it to the podium. At MOTOREX, our involvement in racing is about much more than titles. It is about the continual development of our high-quality products and about finding ways to make them more useful for our customers.

AIR FILTER MAINTENANCE

FILTER CLEANER

Ready to use cleaner for foam air filters. Free of solvents, biodegradable and non-combustible!

RACING BIO LIQUID POWER

Developed closely with Twin Air. Superior, racing quality air filter oil with excellent adhesion. Highly absorbent, optimised air flow & biodegradable.

AIR FILTER OIL 206

Specially developed air filter oil for foam air filter elements. Keeps out sand, dust and water. Great adhesion.

AIR FILTER OIL SPRAY

Air filter oil spray for foam and cartridge air filter elements. Keeps out sand, dust and water.

AIR FILTER CLEANING KITS

Contains all the essential products and equipment to successfully clean and oil foam air filters. Store away for another day!

CLEAN, CARE & PROTECT

JOKER 440

Indispensable for industry, trade & workshops. Lubricates, stops squeaking and protects against corrosion!

INTACT MX 50

Indispensable for industry, trade & workshops. Protects metal surfaces and preserves tools. Lubricates and leaves behind a very effective protective film.

POWER BRAKE CLEAN

Cleans and degreases all brake and clutch components. Removes oil, grease, brake fluid, tar, bitumen + more.

CLEAN, CARE & PROTECT

MOTO PROTECT

Specially designed to preserve painted, metal and plastic surfaces for a longtime! Excellent corrosion protection. **Easy clean pre and post ride.**

QUICK CLEANER

Waterless Cleaner. Quickly and easily removes dirt & dust without the use of water. Safe on plastics, visors, windscreens, paint and metal surfaces.

MOTO SHINE

Special gloss spray for a perfect finish after cleaning. Lasting shine on paint, plastic and chrome. **Creates protective antistatic film to repel dust.**

BRAKE FLUID

RACING BRAKE FLUID

High-performance brake fluid for the highest level off-road racing. High dry and wet boiling points (563°F/383°F, 295°C/195°C). Easily exceeds DOT 4 specifications.

BRAKE FLUID DOT 4.

Superior brake fluid with a wet boiling point of more than 165°C. Prevents the formation of vapor even at extreme braking loads.

BRAKE FLUID DOT 5.1

Superior brake fluid for hydraulic brakes. Extremely high wet boiling point of more than 180°C. Prevents the formation of vapor bubbles even at extreme braking loads.

RIGHT PRODUCT. RIGHT APPLICATION.
